Surprisingly, these burned-out workers don't fear AI—they welcome it

A new survey from Canva reveals teachers aren't mad about AI—in fact, they're hoping the technology can offer them some relief.

Why we should not fear Artificial Intelligence

‘AI Will Save the World’ Says Marc Andreessen

June 30, 2023 by Jaime Hampton

(Phonlamai Photo/Shutterstock)

VC billionaire Marc Andreessen says the world is currently “hysterically freaking out” about artificial intelligence, and he recently wrote a 7,000-word ess to address these fears.

During the Stratechery podcast, Andreessen told ho Ben Thompson that he felt compelled to write “Why Will Save the World” because the world had gone hysterical over A.I. and needed to be set straight. Thompson’s podcast is just one of many (including those from Lex Fridman and Sam Harris) Andreesse has recently visited with his message that AI is a positive force for good.

THE WELL-READ INTERN - HOW TO LOOK AT GPT

- Knows a lot about a lot...
- But unfortunately also talks when he doesn't know something -> Stay alert and check if in doubt
- Doesn't know their own institution -> Always give enough context and ideally examples
- Not good (but tries hard) at reading between the lines -> Always give clear instructions and correct when in doubt
- Somewhat overwhelmed / distracted -> In longer discussions, always remind them what it is actually about

Make this into an instagram post: """Roofer: The Hero We Didn't Know We Needed
Let's be honest—when was the last time you looked at a roof and thought, Wow, that's a fine piece of craftsmanship!? Probably never. And yet, without roofers, we'd all be at the mercy of rain, snow, and the occasional bird that just can't hold it in. Roofers are the unsung heroes of the trade world, the knights of the skylines, the fearless masters of the high ground. And if you're looking for a career that combines skill, adventure, and the occasional suntan, you might just be looking at your future.

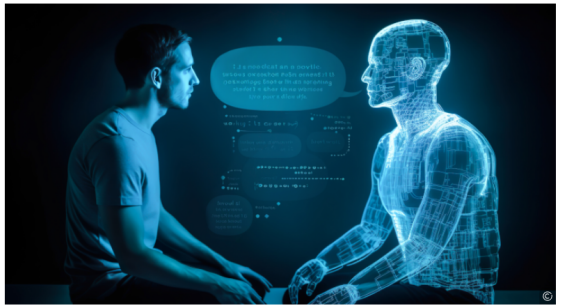
Mit KI schwierige Arbeitssituationen für Auszubildende simulieren

Rollenspiele durchzuführen, kann eine interessante pädagogische Einsatzmöglichkeit für künstliche Intelligenz (KI) im Rahmen der betrieblichen Ausbildung sein. So können Auszubildende etwa im Umgang mit Kundinnen und Kunden - auch in schwierigen Situationen - geschult werden, ohne reale Geschäftsbeziehungen zu gefährden. Besonders attraktiv ist dabei, dass die Art und Weise, wie die Sprachmodelle ihre Ausgaben generieren, automatisch dafür sorgt, dass keine Interaktion gleich verläuft.



KI: Lern- und Arbeitsaufgaben mit ChatGPT erstellen

Generative Künstliche Intelligenz (KI) ist in aller Munde, und auch die berufliche Bildung sieht sich durch diese Technologie vor neue Herausforderungen gestellt. Es gibt zugleich gute Gründe zur Annahme, dass sie von maschinellem Lernen nachhaltig profitieren kann.
