Expert Meeting on Al and TVET

Be at the forefront of Al-driven education and training

One word to describe your experience!

79 responses

Elbefabrik

We have to work WITH Al. There's no other way...

IBMs Assistant and Agent Structure

Alpersona

Seeing the robots in the Elbfabrik

Human vs Al debate

Personas, Al agents and assistants

Al is coming

Al is the future - or maybe it isn't.

Tour of Elbfabrik

Potential of training in health sector with personas (workshop 1)

People seem unaware of the speed of advancement and overly optimistic towards the importance of human skills.

Human Cantered Al

Variety of Al application s in the world of work

Creation of personas

Al changed our education

The different innovative way to use Al tool.

Die 2. Präsentation im Workshop 1

So far i have only been scratching the surface of what is possible with GenAl

It's all about the skills that are necessary and these have to be identified first and then we can think about how to teach them

World wide presence, all levels of insights: university to business like IBM

That the Al won't replace the human but rather complement the human

Experience with Al of other colleagues

Personas for TVET

Al will not replace human.
But human without Al will be replaced by Human with Al.

Al (new) can register experience (old)

The framework

Workshop 3 prototyping

Workshop 1

Al is a tool in our hand

Multitude of ways to apply Al in practice/ academic&TVET purposes

The levels of AI competencies and understanding vary a lot and we need to invest more into bringing everyone along bc tech will not wait

Al not gonna replace humains, but humans with Al with Al will replace those without Using Al can be easy and helpful if you are an expert in your field already. If Not you are prone to hallucination;(

Very complicated splits between automation of work and skills vs deskilling

That AI applications are vast and if well utilized through a human centered approach they can significantly creat great value and transform jobs, processes, education and training and society

The diversity of approaches and oportunities

Al is everywhere, course ideation, creation, delivery

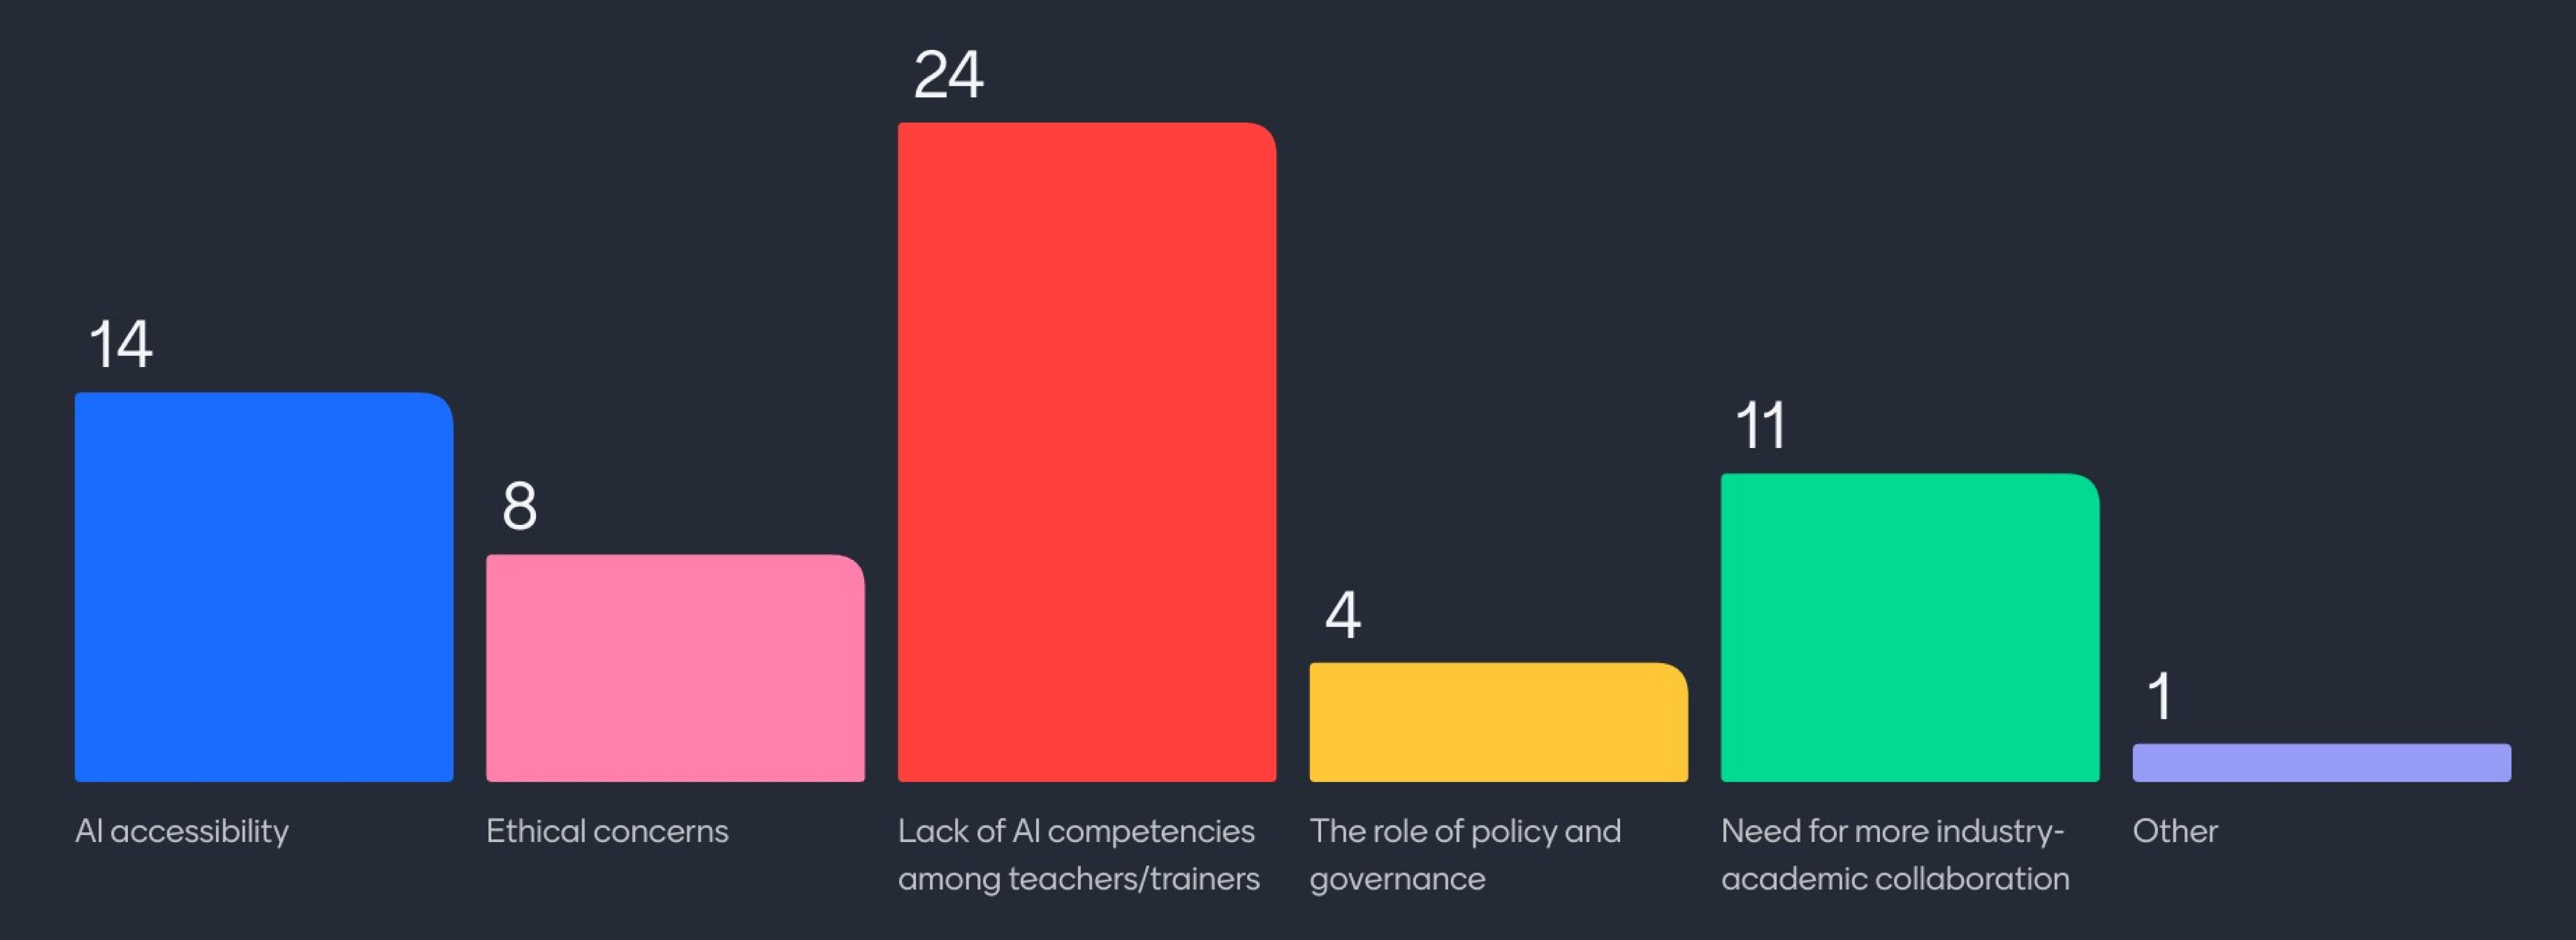

We're late to the party

No choice, we have to consider AI in our activities and support our TVET partners but where to start / what is the next step?

"What is the biggest challenge in AI & TVET?"

"Which of these solutions should be prioritized?"

World trip to partners

Use ChatGPT more often

Contact 3 people I met

Carefully read through the documentation

Make maximum use of Al.

Will disseminate the learnings to other team members

make IA persona

Practising prompts and generating persona

Share the experience

Share the knowledge with my colleagues

Connect on LinkedIn

Conduct AI in TVET presentation and discussion among my peers

Find out more Al platforms

Use Al in education more often

Raise my awareness more in Al in TVET Find partners for projects on Al and TVET.

Al belongs to our lives

Network to find solutions for Al enhanced teaching that moves away from homework based assessment.

Be more brave and datelined using Al

Test more models, including voice mode.

Connect!

Tell everyone about this event

Enhance exchange on Al use among team members.

Share knowledge I gained here

Awareness of the policy makers about the dire need of integrating AI in TVET

Share with my colleagues theses presentation Develop partnership

I would try some hands on with AI

Build a wide and strong Al awareness and advancement network for education in my country and SSA region

Explore synergies how to include AI in TVET for our projects

Plan activities considering Al litteracy training program

Post about the event on LinkedIn

Thank ouy

Buy a farm to feed myself when AI takes all our jobs :) Catch up with some of the newly acquainted colleagues
