Organic sourcing for development

Discover the organic potential from developing and emerging countries!

Since 2015, **Import Promotion Desk (IPD)** – the German initiative for import promotion – and the international service provider **Gesellschaft für Internationale Zusammenarbeit (GIZ)**, have been present at BIOFACH with a joint stand. In 2025, this successful cooperation is celebrating its 10th anniversary.

Under the motto “Organic sourcing for development” we connect German and European importers with selected exporters from developing and emerging countries.

At BIOFACH 2025, we are showcasing together around 50 innovative companies from Brazil, Cambodia, Côte d’Ivoire, Ecuador, Egypt, Ethiopia, Ghana, India, Indonesia, Kenya, Madagascar, Morocco, Peru, South Africa, Sri Lanka, Tanzania, and Ukraine.

Our suppliers bring a wide variety of high-quality organic products to Nuremberg.

Take a look at the product finder starting from page 6, which gives you an overview of the available products.

Take advantage of **BIOFACH 2025** and visit us at our booth in **hall 1, 251** – there we will put you in direct contact with exporters that are of interest to you.

On the following pages you will also find detailed information about the IPD evaluated exporters and the companies supported by GIZ.

Import Promotion Desk (IPD)

Open up new markets and find reliable business partners

Regardless of whether you require natural ingredients for foods, pharmaceuticals or cosmetics: High-quality products are the only way to satisfy the high demands of consumers.

It is therefore crucial to find the right suppliers throughout the world. Import Promotion Desk (IPD), the initiative for import promotion, supports you exactly in this.

On your behalf, we undertake the international sourcing of reliable trade partners in selected partner countries.

We identify highly promising producers for you who are able to reliably meet the demand on the European market. We prepare the suppliers thoroughly for the EU market: considering factors such as product quality, exportability, export capacity, and compliance with international standards and certification.

Thanks to our preparation, you will meet business partners who know what is important to European importers.

Visit us in hall 1, booth 251!

At BIOFACH 2025, we introduce you to reliable IPD suppliers of organic products from our partner countries Brazil, Cambodia, Côte d'Ivoire, Ecuador, Egypt, Ethiopia, Ghana, Indonesia, Kenya, Madagascar, Morocco, Peru, South Africa, Sri Lanka, Tanzania, and Ukraine.

On the following pages you will find detailed information about the IPD exporters. We establish direct contact to these suppliers and organise b2b meetings at the trade fair.

Our mediation is neutral, quality-conscious and free of charge.

IPD is an initiative of the Federation of German Wholesale, Foreign Trade and Services (BGA) and sequa, the development organization and partner of German business. We are funded by the Federal Ministry for Economic Cooperation and Development (BMZ) and part of the "Partners in Transformation – Business & Development Network", into which the BMZ programmes for economic actors are organised.

In line with our development policy objective, we aim to increase exports from partner countries, promote innovation and higher value creation in order to contribute towards sustainable economic development in partner countries.

Hesed Agriculture Trading

Hall 1 | Booth 1-251

Cambodia

Hesed is an exporting company based in Cambodia, which sources, processes, and exports agricultural products based on fair trade and inclusive business models.

Palmyra blossom sugar, produced from the sap of palmyra palm trees, has obtained GI certification, acknowledging its unique geographical characteristics and quality internationally. Recognized as a low-glycemic ingredient, it is a natural sweetener and an ideal sugar substitute that supports healthy eating habits, rich in antioxidants, vitamins, and minerals.

Palmyra blossom sugar enhances the flavor and aroma of various foods with its harmonious taste, making it particularly ideal for homemade baking and beverages. Moreover, the company takes pride in their excellent facilities and sustainable operations within Cambodia.

Coop Ca Cayat

Hall 1 | Booth 1-251

In 2009, its founder Mr. Traoré Sinan, a cacao producer himself, arrived in Yakassé-Attobrou discovering a reality where farmers are poorly remunerated and lead challenging lives. This inspired him to create the Yakassé-Attobrou Agricultural Cooperative (CAYAT) in October 2010, with the primary goal of ensuring a decent life for producers.

Thanks to an awareness tour, the journey into organic cacao begins approximately ten years later. In addition, CAYAT also embarked on an agroforestry cultivation project with selected organic certified members. Instead of just occasional contracts, they aspire to build strong relationships and lasting commitments. Behind their beans is the hard work of Cayat's producers and their dedication to nature-friendly agriculture. Every transaction the company concludes is not merely a commercial deal, but an opportunity to turn the efforts of their dedicated members into rewards and to shine the light of recognition on those who are often in the shadows.

Products & quantities per year

- Cacao beans / 8,000 t

Certifications

- ORGANIC EU
- FAIRTRADE
- RAINFOREST ALLIANCE

Source of raw material

- Small-scale producers in the La Mé region of Côte d'Ivoire

EcoCajou

Hall 1 | Booth 1-251

EcoCajou, a newly established cashew processor (50-60 t/day) operating since October 2023 in Northern Côte d'Ivoire, specializes in the production of organic cashew kernels, it aspires to spearhead agricultural transformation in the Kabadougou region of Côte d'Ivoire.

Recognizing that unequal growth is inefficient and results in wasted human resources and missed opportunities for development and innovation, the company views their social policy as a business strategy. Consequently, by adopting a holistic, farmer-centered approach, they aim to drive positive changes within the communities engaged in the organic raw cashew nuts sourcing. Their business impact 12,746 small cashew producers (including 1,512 women, and 3,690 young people) within 460 communities. They are actively seeking partners who share a similar commitment to co-create a lasting and reliable narrative with the producing community, fostering a sustainable kernel economy.

Products & quantities per year

- Cashew kernels / 300 t

Planned production as of 2026

Asociación Artesanal Sabor Arriba

Hall 1 | Booth 1-251

Sabor Arriba is a farmer-owned cooperative supporting the development of 380 rural families by providing access to markets they would otherwise not reach. Established in the northern province of Esmeraldas, Ecuador, Sabor Arriba elevates the reputation of Ecuadorian cacao, building trust-based and professional relationships across the cacao value chain.

Located in the southernmost part of the exuberant and biodiverse Chocó Bioregion, they offer a unique solution for companies seeking direct-trade cacao and derivatives from an exotic origin.

Nunalabs

Hall 2 | Booth 2-412

Nunalabs is a leading innovator in botanical extraction, rooted in the rich biodiversity of Ecuador. They specialize in creating high-quality herbal extracts for industries such as food and beverage, nutraceuticals, cosmetics, and supplements. Combining modern science with traditional wisdom, they unlock the unique benefits of native plants to produce extracts that are natural, effective, and versatile.

Their state-of-the-art low-temperature extraction process ensures the preservation of bioactive compounds, delivering potent and sustainable products. Beyond innovation, sustainability drives their mission. Through wildcrafting, agroforestry, and partnerships with indigenous communities, they protect Ecuador's rainforests while fostering ethical sourcing and economic growth for local populations.

Nunalabs also offers tailored formulations and white label products to meet the distinct needs of our partners, helping them create standout products in competitive markets. By capturing the true essence of plants, Nunalabs enable businesses to integrate the power of nature into their offerings.

Apotec Bay

Hall 4 | Booth 4-564

Apotec Bay Botanical Solutions, part of the "Ottoman Group" with over 90 years of experience in the botanicals sector, has been growing organic herbs in Egypt and exporting them to global markets since 1965. Now in its fourth generation, the company operates the largest industrial supercritical CO₂ extraction plant in the MEA region. Using green chemistry, Apotec Bay uses carbon dioxide as a solvent for sensitive plant materials. The company processes approximately 900-1,000 tonnes of raw materials annually.

Apotec Bay is a trusted and reliable manufacturer of premium oleoresins, CO₂ extracts, powder extracts, natural flavours, natural colours, essential oils, herbs and spices.

It supplies natural flavours, colours, aromas and active ingredients to major food and beverage, nutraceutical and pharmaceutical companies worldwide, customising products to meet customer specifications.

Bio Oasis is a family business. The journey started in 1988 when founder Prof. Dr. Hamdy Seif El-Nasr was reclaiming his farm in the desert area and was converting it into an organic farm.

Bio Oasis adapted its own system for small farmers (collective farm system), while also maintaining its own farm and sourcing additional produce from these smallholders.

Bio Oasis focuses on delivering highest quality to its customer world wide and providing a reliable and sustainable service. Its success is achieved through well-trained quality assurance staff, working on the farm and processing facilities.

Products & quantities per year

- Basil, lemongrass, hibiscus / 80 t
- Dehydrated garlic & onion / 80 t
- Nigella seeds / 90 t

Certifications

- ISO 22000
- ISO 9001

Source of raw material

- Own cultivation in in South Tahrir
- Cooperatives and small-scale farmers from Aswan, Beni Suef, Fayoum and South Tahrir

Beza Mar

Hall 1 | Booth 1-261

Beza Mar Agro-Industry is a pioneer organization in the apiculture subsector.

The company was established in 2003 with the aim of collecting, processing and supplying the untapped apicultural resources of Ethiopia for both the local and export markets.

Beza Mar is established as a private limited company owning two modern honey processing plants.

The company has been engaging in the production of table honey and beeswax since 2008 and has gradually started to export honey and beeswax to the international market.

After the EU accreditation of Ethiopia under the third country listing, Beza Mar became the first private company to supply organic semi-processed honey and beeswax to the UK market. Since then, the company obtained exposure to foreign markets and became registered as an exporting company of honey and beeswax. Furthermore, Beza Mar expanded its market to other EU countries, Middle East, Japan and USA.

Products & quantities per year

- Honey / 400 t
- Beeswax / 200 t

Certifications

- ORGANIC (EU, NOP)
- ISO 22000

Coastal Groves

Hall 1 | Booth 1-251

Coastal Groves is a producer and processor of organic citrus products. It was founded in 1994 to share the wonderful natural citrus products of Ghana with the world, and to provide poor Ghanaian citrus farmers access to global markets, and better livelihoods as a result.

All ingredients are organically grown in Ghana's citrus belt, a 200km region in the central region of Ghana.

Coastal Groves has two main business lines: the juice business line which produces organic orange juice, and the peels business line which produces organic orange and lemon peels.

Products & quantities per year

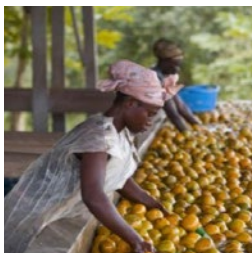

- NFC orange juice / 3,000 t
- Orange peels / 100 t
- Lemon peels / 80 t

Certifications

- ORGANIC (EU, NOP, JAS)

Source of raw material

- Own cultivation
- Small-scale farmers

Jassa Organics

Hall 1 | Booth 1-251

Jassa Organics was established in 2023 by a female entrepreneur with a passion for medicinal and aromatic plants.

As a responsible Ghanaian business, Jassa Organics is committed to giving back more to the planet than it takes. This commitment begins with paying farmers and workers a fair price for raw materials and services.

What differentiates Jassa Organics from others in the sector is the company's use of innovative greenhouse technology to drive quality and excellence. Orange and lemon peels are dried on purpose-built trays under sealed and controlled conditions within a dedicated greenhouse. This significantly reduces the risk of contamination by waste matter, insects, or vermin, making it possible to offer customers nature's best – clean, unadulterated, sun- and air-dried organic peels.

For the 2025/26 season, Jassa Organics will continue to offer wild-collected, organic-certified Griffonia seeds (*Griffonia simplicifolia*) to its customers.

Products & quantities per year

- Orange peels / 90 t
- Lemon peels / 15 t
- Griffonia / 10 t

Certifications

- ORGANIC EU

Source of raw material

- Small-scale farmers
- Wild collection

āluān

Hall 1 | Booth 1-151

Āluān produces the finest quality raw virgin coconut oil on Simeulue Island, Sumatra, Indonesia. As an impact company, Āluān ensures traceability from origin, sourcing its oil from smallholder farmers. The company actively restores endangered wildlife through the Ecosystem Impact Foundation and works to improve the livelihoods of traditional Indonesian farmers on Simeulue Island. Āluān takes the lead in replanting and inter-cropping initiatives, supports women as leaders of change, and operates within a circular business model while combating deforestation.

Āluān's commitment is creating positive impacts for both people and the planet, aligning its efforts with the requirements of the CSRD, CSDDD, EUDR, TNFD, and other relevant regulations.

Products are exported directly via the Port of Medan, Indonesia, or sourced closer to customers through several distribution hubs. Āluān is interested in forming long-term partnerships with buyers, regardless of size. As the company grows, so does its positive impact in the region.

Products & quantities per year

- Virgin coconut oil / 200 t
- Coconut oil / 40 t
- Products in development: coconut flour, coconut fibre products, activated coconut charcoal, dried ginger, tumeric and moringa.

Berkat Petani (Gulapa)

Hall 1 | Booth 1-151

Berkat Petani Indonesia (Gulapa) is a manufacturer of high-quality coconut sugar. The company name comes from their mission to be a blessing and increase the life standard of local farmers in Central Java by partnering up with them and giving back to society.

Coconut sugar is produced by collecting the sap from the flower bud of the coconut palm tree. Not only is it a healthier alternative, but it is also a more sustainable option, as coconut palms are a renewable resource that requires minimal inputs and can be grown in diverse agroforestry systems. In Indonesia, coconut sugar has been used for centuries as a traditional sweetener.

Gulapa's role is to support and maximize the local community by working together with Non-Governmental Organization as they strive to improve the prosperity of the local community

Products & quantities per year

- Crystal coconut sugar / 677 t
- Ginger coconut sugar / 17.4 t
- Tumeric coconut sugar / 15.8 t

Gunung Hijau Maserang

Hall 1 | Booth 1-151

Gunung Hijau Maserang is a pioneering renewable energy company that harnesses geothermal power to process agro products. Their vision is to create a sustainable future through the preservation of nature and the empowerment of local people.

The company's flagship project in North Sulawesi utilizes geothermal energy to power its sugar processing factory and support the livelihoods of local farmers.

Gunung Hijau Maserang produces certified organic arenga sugar with a distinct caramel taste and a lower glycemic index compared to other sweeteners. The company has a strong commitment to sustainability that goes beyond operations, as they collaborate with local communities to promote sustainable agriculture, reforestation, and ecotourism.

Hugo Inovasi

Hall 1 | Booth 1-151

Hugo Inovasi is manufacturer and exporter of coconut sugar. The company is located in the Central Java, Banyumas, the heart of coconut sugar farmers and plantations. The company processes sugar directly from farmers in its own facility, serving as a guarantee for a short supply chain and complete traceability.

Hugo's coconut sugar carries industry standard certification seals. It is therefore made by applying biological and mechanical practices that support ecological balance, on-farm cycling of resources, and the conservation of biodiversity.

Hugo Inovasi is growing together with farmers to live to their fullest potential. They are not only making profit, but also benefit.

Products & quantities per year

- Coconut sugar / 800–1,000 t
- Coconut syrup / 140–200 t

Certifications

Avopro Kenya

Hall 1 | Booth 1-175

Kenya

Avopro is located in Sagana, right in the heart of the highly fertile and productive agricultural zone of the Mt. Kenya region. The volcanic soils in this expansive zone coupled with a favorable climate offer great conditions for growing avocados. Over 80% of Avopro's raw material is sourced from hundreds of small-scale farmers registered in their organic and Fair for Life program. The farmers use intercropping techniques that help protect the soil from degradation as is often found in monocultures.

Avopro's cold pressed avocado oil is produced according to their food safety management system benchmarked to the ISO 22000 standard. The Avopro team considers themselves sticklers for integrity, teamwork, and are relentless in their pursuit for quality and customer satisfaction.

Products & quantities per year

- Crude avocado oil / 1,780 t
- Extra virgin avocado oil / 420 t

Certifications

- ORGANIC (EU, NOP, JAS)

Privamnuts

Hall 1 | Booth 1-251

Kenya

The macadamia nuts of Privamnuts are naturally grown in the mineral-rich highland soils of Mt. Kenya, right at the equator. The farmers allow their trees to grow most naturally with very little intervention, using available resources like animal manure only. Spraying is non-existent.

Privamnuts has a modern processing facility as well as a macadamia nursery that supplies over 100,000 organically grafted macadamia seedlings. End-to-end quality monitoring systems are implemented and the quality control team adheres to a strict food safety management system from the farm to the point of sale.

Privamnuts exports macadamia kernels to different global markets. The American market accounts for the largest share of its exports with the other wmarkets being Europe, the Middle-East, Japan and China.

Products & quantities per year

- Macadamia nuts kernel / 1,050 t

Floramad

Hall 1 | Booth 1-157

Founded in 2010, Floramad is a supplier of pure and natural essential oils sourced directly from Madagascar. Its product range includes rare essential oils extracted from Madagascar's native plants.

The company manages every single point of the production process - from farming to distillation until shipping - ensuring compliance with quality and regulatory standards. The raw materials are grown in optimal conditions to preserve the purity and quality of the essential oils.

Working closely with local communities, and prioritizing eco-friendly practices, Floramad values the virtues of Madagascar's flora to offer various essential oils to the cosmetics, fragrance, aromatherapy and flavoring industries.

Products & quantities per year

Lycheeland

Hall 1 | Booth 1-157

Lycheeland is a Malagasy company which was created in 2015 by Hasina Rabenantoandro, a woman entrepreneur driven by the desire to transform waste agricultural products into healthy food.

Lycheeland produces exotic dried fruits and vegetables, fruit and vegetable powder and gluten-free flour, with currently a capacity of 30 tons per year.

Its products are air-dried at low temperature, 100% natural, free from preservatives, no sugar added, organic certified, with a shelf-life of 2 years.

Lycheeland already exports its products, mainly to Japan and Europe.

Moringa Wave

Hall 1 | Booth 1-157

Madagascar

Founded in 2016, Moringa Wave supports farmers and smallholders in Madagascar through the production, processing and marketing of Moringa Oleifera.

The company chose to employ mainly young people and women to enhance the local economy. Moringa Wave's mission is to improve the nutritional situation and increase agricultural incomes in Madagascar through its collaboration with the local community and its commitment to the preservation of biodiversity and reforestation by planting Moringa trees.

The company offers a range of food products based on organically grown Moringa Oleifera as well as a range of cosmetic products made from pure and natural Moringa Oleifera oil. Moringa Oleifera has been widely used in traditional medicine, specifically in India. It is a great source of antioxidants and amino acids and a food supplement rich in nutrients, mainly protein.

Products & quantities per year

- Moringa leaf and powder bulk / 24 t
- Moringa oil / 4 t

Sambirano

Hall 1 | Booth 1-251

Sambirano is a company based in Madagascar offering high-quality cacao beans, cacao mass, cacao juice as well as vanilla beans. The company was created by two natives from the cacao region in Madagascar 18 years ago. It has become one of the major actors of cacao in the country.

The company's strategy is based on high-quality and sustainable cacao beans (superior and premium grade). With Organic and Fairtrade premium, farmers organized in two cooperatives (Sambirano Mateza CSM and Cooperative Bio du Sambirano COBIOS), receive fair prices for the beans.

Products & quantities per year

- Cacao beans / 2,000 t
- Cacao mass / 100 t
- Cacao juice / 100 t
- Bourbon vanilla beans / 3-5 t

Certifications

- ORGANIC (EU, NOP, BIOSUISSE)
- FAIRTRADE

UCLS

Hall 1 | Booth 1-157

UCLS is a union of 23 cooperatives, representing 498 small producers dedicated to export high quality and tailor-made cacao beans that meet the specific needs of each customer. Grown in the recognized agroforestry terroir of the Sambirano Valley, their cacao beans are classified as fine-quality, with a unique aromatic profile featuring citrus, woody, chocolatey and red fruit notes.

UCLS operates a laboratory to guarantee the high quality of their beans, conducting continuous flavour evaluations of the cacao mass through a tasting panel. A team of engineers and agronomy experts supports sustainable production practices while fostering a socio-organizational foundation among farmers.

Products & quantities per year

- Cacao beans / 700 t

Coopérative Femmes Dades

Hall 1 | Booth 1-251

Morocco

Femmes Dades is a women's cooperative specialized in the production and commercialisation of organic Damascina roses. They offer the fresh smell of south-east Moroccan oasis, throughout a wide range of high-quality organic products, such as dried rose, rose water, rose oil, and certain cosmetic products based on the rose, like cream, Moroccan ghassoul and soap.

The main purpose of the cooperative is to valorize and market the production of rural women to enhance their livelihoods through the production and sale of rose products. To achieve this target, the cooperative trains its members on organic production and the good agricultural practices to ensure a sustainable production that respects the environment of the oasis. The cooperative currently exports to Belgium, France, Germany and Switzerland and aims at increasing its exports across Europe.

Products & quantities per year

- Dried roses / 5t
- Rosewater / 20t
- Creams of rose / 0.02t
- Rose face / body wash ghassouls / 0.2t

Certifications

- ORGANIC EU

Amazon Specialties

Hall 1 | Booth 1-251

Amazon Specialties, founded in 2016 by two Peruvian friends, shares the nutritional benefits of Peruvian superfoods globally with a commitment to social and environmental responsibility. After 12 years of Amazonian exploration and founding an NPO to support local communities, they partnered with over 4,500 farmers to provide premium cacao, yacon, brazil nuts, maca, and other Peruvian superfoods.

With collection centers across the Amazonia and Andes, and a processing plant near Lima, they trade directly (and fairly), promote organic and regenerative farming practices, minimize environmental impact, creating socioeconomic value while realizing their dream of making a true positive impact for the local communities and environment.

Products & quantities per year

- Cacao beans / 300 t
- Cacao derivatives (nibs, powder, paste, butter, tea) / 200 t
- Dried fruits (physalis), brazil nuts / 70 t
- Yacon (syrup & powder) / 20 t
- Powders (maca, ginger, turmeric, banana, purple corn, mesquite) / 60 t

Certifications

Andean Roots

Hall 2 | Booth 2-515

Andean Roots is an agroindustry that produces, processes and markets organic and functional superfoods from Peruvian biodiversity. It was founded in June 2007 in the Peruvian Highlands. The company's farm is located close to its processing plant, which allows for quick processing of the products, resulting in high quality and cost efficiency.

Andean Roots works with 20 farming families in the region to grow and harvest yacon and goldenberries, which are then processed and marketed. In the processing of its products, the company specializes in vacuum concentration and continuous dehydration. This allows to preserve the physical, chemical and organoleptic characteristics of the raw material.

Products & quantities per year

- Yacon syrup / 180 t
- Yacon powder / 120 t
- Yacon dried / 140 t
- Goldenberry syrup / 60 t

Certifications

- ORGANIC (EU, NOP)

Inka Fresh

Hall 1 | Booth 1-251

Inka Fresh is a family-owned company that grows, processes, and exports high quality dehydrated fruits, vegetables, herbs and spices from the highlands and rainforests of Peru. The fields and processing plant are located closely together, in such a manner that peak harvest and post harvest quality are maintained before processing. The plant is located in Satipo, in the central jungle of Peru. The tropical weather of the zone (rainforest) allows for year round production. The company is vertically integrated, from the fields to final export destination, in such a way that complete traceability is guaranteed for the products.

Inka Fresh owns a storage and sorting facility close to the shipping port that allows consolidation of the export containers. Founded in 2004 they have continually expanded their operations mainly in North America and are now targeting to expand operations in Europe.

Products & quantities per year

- Ginger slices, granules, powders (dehydrated) / 200 t
- Orange slices, granules, powders (dehydrated) / 200 t
- Pineapples slices, cubes, powders (dehydrated) / 200 t
- Mango slices, granules, powders (dehydrated) / 200 t
- Curcuma slices, granules, powders (dehydrated) / 200 t
- Cassava slices, granules, powders (dehydrated) / 200 t

Peruvian Nature

Hall 2 | Booth 2-515

Established in 2001, Peruvian Nature is a leading Peruvian company dedicated to producing and marketing high-quality dehydrated ingredients. These superior ingredients serve as essential raw materials for various sectors, including food production, manufacturing industries, and direct consumer use. Globally, these ingredients (powder, extracts, dried) are utilized in nutritional supplements, bakery products, infusions, pet food, tablets, and more. They apply OSS technology, an organic sterilization system, which reduces the bacterial load through a 100% natural process using steam and vacuum. This technique is adapted to each product type, ensuring the highest quality and safety standards required by global markets such as the USA, Europe, and Asia. Their products are vegan, non-GMO, and allergen-free, meeting the growing demand for health-conscious and environmentally friendly options. Peruvian Nature's commitment to excellence keeps the company at the forefront of the industry, setting new benchmarks for quality and innovation.

Products & quantities per year

- Lucuma powder / 200 t
- Sweet potato powder / 150 t
- Camu camu powder / 50 t

Kaukou

Hall 1 | Booth 1-251

Kaukou honeybush tea is organically cultivated on the Herold Meander farm situated in the Garden Route of South Africa. Kaukou was established in 2018 by an indigenous family who are developing a derelict and abandoned farm with 18 employees.

The farm is socially and environmentally sustainable where honeybush are naturally cultivated on southern slope farmlands. The indigenous Khoikhoi used the honeybush shrub to make a medicinal tea with a pleasant, mildly sweet taste and aroma.

The tea formed part of their traditional healing systems, a practice that remains applicable in modern times. Honeybush is a herbal tea that is caffeine-free with very low tannin levels and high antioxidants.

Products & quantities per year

Ellawala Horticulture

Hall 1 | Booth 1-165

Ellawala Horticulture, founded in 1992, is a pioneer in Sri Lankan agriculture. The Tom EJC mango variety was introduced by Ellawala and received formal recognition from the Department of Agriculture in 2003 and is now the variety of choice for cultivation in the dry and intermediate zones of Sri Lanka.

In 2017, the company began exporting organic fresh mango and other fruit varieties to several countries worldwide. In 2021 Ellawala commissioned a modern food production facility located within its extensive farm in the Sri Lankan North Central Province. With five production lines, including pulping, canning, cooking, freezing, and dehydrating, Ellawala can produce a wide range of tropical fruit products that are full of natural goodness made from tree ripened and handpicked fruits that are grown in their organic farms.

Ellawala has 150 employees, of which 70% are women from the villages around the factory.

Products & quantities per year

- Dried mango, pineapple, banana, papaya, coconut / 120 t
- Mango, pineapple, jackfruit chunks in juice in cans or jars / 720,000 units
- Mango pulp, pineapple juice / 720 t
- Banana paste/ 20 t
- Mango, banana powder / 10 t each

GFP Organics

Hall 1 | Booth 1-251

GFP Organics is a Tanzanian family-run, social impact-oriented enterprise that has been building bridges between smallholder farmers for two decades. These farmers grow organic spices in villages around the East Usambara Mountains (part of the Eastern Afrotropical Biodiversity Hotspot), creating sustainable market opportunities in international markets for their high-quality organic spices.

Organic spice farming supports communities by diversifying livelihood options, increasing incomes, reducing dependence on natural resources, and enhancing human-wildlife coexistence. GFP ensures that women and youth have equal opportunities to engage in the production and trading of spices, thereby improving their overall quality of life.

GFP has been organically certified for 19 consecutive years and has been exporting dried organic whole spices to the European Union throughout this time. GFP is committed to continuing its mission of building strong and sustainable businesses.

Products & quantities per year

UkrBioGroup

Hall 4A | Booth 4A-625

UkrBioGroup is a vertically integrated group of companies owned by Kravchenko family, founded in 2003 with an emphasis on organic agriculture and now has over 5,500 ha of organic certified fields located in the Dnipropetrovsk region, the center of Ukraine.

Since 2013, UkrBioGroup has been working on the development of Ukrainian organic production and asserting values of careful and responsible agri-producer.

UkrBioGroup ranks among the Top5 organic producers in Ukraine with agricultural practices and processing facilities complying with the requirements of the European and American markets.

UkrBioGroup conducts primary processing in its own technological line, offering a purity level from 98.0 to 99.99%. Around 30,000 tons can be stored in 12 own certified warehouses and packing options range from big-bags, liner bags, polypropylene and paper bags on pallets. Delivery is possible under FCA, DAP, FOB, CFR and CIF terms.

Customers can be confident in the quality of products, due to the effective high degree of cleaning and CO₂ pre-treatment.

Products & quantities per year

- Sunflower seed (HO) / 3,000 t
- Soft wheat (milling and feeding) / 5,000 t
- Yellow peas / 500 t
- Yellow millet in husk / 1,000 t

Deutsche Gesellschaft für internationale Zusammenarbeit (GIZ) GmbH

At BIOFACH 2025, the joint stand of GIZ and IPD is celebrating its 10th anniversary. A successful cooperation of presenting carefully selected partner companies from projects worldwide, organic project experiences and possibilities for future cooperation with the private sector.

On behalf of the Federal Ministry for Economic Cooperation and Development (BMZ), GIZ and the Import Promotion Desk (IPD) jointly organize a stand where GIZ provides an overview of its engagement in organic agriculture, companies can present their products and match to make business with the private sector.

In 2015 the collaboration was started: to co-create a space for companies from BMZ partner countries to have better access to the globally leading organic fair, receive guidance before and during the fair, and most importantly, to make new business connections and agreements in Europe.

The overall goal is connecting exporters with importers in the European markets and establishing sustainable trade relationships that help improve the lives and communities in the partner countries.

GIZ is a global service provider in the field of international cooperation for sustainable development with over 50 years of experience. As a federally owned enterprise, it supports the German government, in particular the BMZ and other clients, in around 120 countries in achieving their development objectives.

On behalf of the BMZ, GIZ contributes to the BIOFACH each year by presenting the work of German development cooperation in organic production. GIZ works with its partners to develop effective solutions that sustainably improve the living conditions of people in our partner countries. We help identify the potentials of individuals and/or businesses and provide local and sustainable support to turn opportunities into successes, in regional, national and international markets.

Established since 1996 within the Egyptian market and since 2012 on the international stage, Al RehabHerbs is a dedicated specialist in medicinal and aromatic plants sourced from Egypt. Their distinction lies in a robust and well-established supply chain that sets them apart.

Alrehab Herbs approach encompasses the complete spectrum: cultivation adhering to GAP and GHP standards, drying techniques encompassing both sun and advanced machine drying, processing that aligns with GMP guidelines, and packaging crafted from fresh fibers to mitigate MOSH/MOAH concerns.

They predominantly serve key markets including Europe, the USA, and the Gulf region. Their credentials encompass prestigious certifications such as ORGANIC (EU, NOP), FSSC 22000, KOSHER, and Sedex, underlining the commitment to quality and ethical practices.

Harraz is a family-owned company, established in 1939. The founder Mr. Abdel Rahman Harraz was a herbalist and started with herb trading and herbal medicine. He was well known in his field and fostered the knowledge of herbal medicine in Egypt.

The company produces herbs and spices (e.g. black cumin seed, hibiscus and sage), tea (e.g. anise, moringa and chamomile), cold pressed oils (e.g. black cumin, jojoba, pomegranate seed) as well as selected instant natural drinks. With the development of science and the modern trend to return to nature and herbal medicine, Harraz develops continuously further in order to meet modern standards and develop high quality products.

Products & quantities per year

- Herbs and spices (e.g. chamomile, fennel, coriander) / 600 t
- Herbal teas (e.g. anise, peppermint) / 30 t
- Cold pressed oils (e.g. black cumin, sesame seed) / 200 t
- Essential oils (e.g. anise, lemongrass, peppermint) / 5 t
- Instant natural drinks (e.g. hibiscus, tamarind) / 150 t
- Natural soap (e.g. jojoba, olive oil) / 25 t

Certifications

- ORGANIC EU (in process)
- FSSC 22000

Betigil Moringa

Hall 1 | Booth 1-251

Betigil Moringa, operating under the brands Enat Moringa and tibibiri, champions health and well-being through premium organic moringa products. Enat, meaning “mother” in Amharic, reflects nurturing care, while tibibiri symbolizes “cooperation,” highlighting its partnership with 20 women smallholder farmers in Ethiopia.

As the first Ethiopian company licensed to produce and export moringa in 2012, Betigil Moringa has been instrumental in bringing this traditional superfood to international markets. Its organic farm and production facility in Arba Minch, Southern Ethiopia, utilize shade drying to preserve the plant’s vital nutrients and healing properties.

Moringa is a fast-growing tree that has earned a reputation of being the earth’s most nutritive plant and can indeed be called a “super food”. Known locally as “Shiferaw” or “the plant that 1,000 diseases fear,” moringa is celebrated for its exceptional nutritional and medicinal value. Today, Betigil Moringa exports Ecocert-certified products to Europe and Japan, sharing Ethiopia’s finest with the world.

Products & quantities per year

- Moringa leaf flakes / 40 t
- Moringa powder / 20 t
- Moringa seed oil / 1,000 l
- Moringa tablets / 1,155,000 units

Ideal Providence Farms

Hall 1 | Booth 1-251

Ideal Providence Farms (IPF), established nearly 20 years ago by a passionate woman farmer, specializes in citrus products. In addition, IPF cooperates with women groups, around 800 women, in the Upper West and Northern Region for the wild collection of shea nuts and the traditional production of shea butter. IPF products are true to type as their slogan depicts "traceable to nature". Certified organic and a member of IFOAM, IPF operates four farms covering 150 acres and a processing facility in Greater Accra. IPF exports its products to Europe, the USA, Canada, and neighboring countries.

Products & quantities per year

- Shea butter / 100 t
- Citrus peels (lemon, lime, orange, bitter orange, lemon grass, grapefruit) / 30 t
- Butterfly pea flower / 4 t

M.G. Farms and Trading

Hall 1 | Booth 1-251

M.G. Farms and Trading is a Ghanaian agricultural company specializing in the cultivation and export of high-quality fruits. Founded in 1999, the company began with papaya production and now offers conventional and organically certified Solo Papaya and organic fresh and dried coconuts for export.

To optimize growing conditions, M.G. Farms relocated to Ghana's Eastern Region, where it manages a 100-acre papaya farm and cultivates pineapples (Sugar Loaf and Smooth Cayenne varieties). In the Central Region, it operates a 122-acre coconut plantation and has recently expanded with an additional 1,262 acres of farmland.

Serving both export and local markets, M.G. Farms produces organic Solo and Golden Yellow papayas as well as dwarf coconuts. The company has also diversified into processed foods, offering snacks such as plantain chips (ripe and unripe), cocoyam chips, potato chips, and papaya chips.

M.G. Farms is committed to delivering quality produce and innovative products to meet global and local demand.

Modern Star Sher

Hall 1 | Booth 1-251

Modern Star Sher processes high-quality, unadulterated organic shea butter in commercial quantities for export to the food, pharmaceutical, and cosmetic industries in Europe and other markets. Specializing in processing organic shea nuts, the company produces premium shea butter, black soap, and other body care products, such as neem seed oil and baobab seed oil, for both export and local markets.

Based in Ghana's Savannah Region, the social enterprise focuses on empowering young women and promoting sustainable agriculture. Partnering with over 600 women collectors and employing 58 women processors, Modern Star Sher fosters local economic growth.

Their products are Ecocert-certified organic for the US and EU markets, ensuring adherence to the highest standards of quality and sustainability.

Jaivik Avam Prakrutik

Hall 1 | Booth 1-251

JAP-PCL is a farmer-owned, multi-state producer company in India representing 1,751 certified organic farmers from Karnataka, Tamil Nadu, Kerala, and Andhra Pradesh. Founded to connect organic and natural farming smallholders with broader markets, the company name reflects its mission: “jaivik” (organic) and “pratrutik” (natural).

JAP-PCL is certified under the National Organic Program (NOP) in the USA and the National Programme for Organic Production (NPOP) in India, which is aligned with international standards such as those in the EU. These certifications ensure that their products meet strict organic standards for both domestic and international markets, validating their commitment to sustainable, organic farming practices.

Their products include bulk organic spices, fruits, and vegetables for both domestic and export markets.

Products & quantities per year

- Red chilli (SHU 20K - 30 K) / 300 t
- Turmeric (3%-4.5%) / 250 t
- Black pepper (500-530 g/l) / 50 t
- Cashew nuts / 100 t

UKCOOFED

Hall 1 | Booth 1-251

UKCOOFED was founded in 2015 with a vision to empower local farmers through organic farming practices. The Federation manages over 800 hectares of certified organic farms, supporting the production of spices, rice, and various crops. UKCOOFED operates advanced facilities such as spice cleaning machinery, a turmeric pulverizer, and a virgin coconut oil unit. It also promotes value-added initiatives like jackfruit, honey, and kokum clusters, ensuring fair market prices and fostering sustainable livelihoods for farmers.

UKCOOFED's farms are certified under the National Organic Program (NOP) in the USA and the National Programme for Organic Production (NPOP) in India, which is aligned with international standards such as those in the EU, and the international Fair for Life certification, ensuring adherence to strict organic standards for both domestic and international markets.
